

MBS Extinguishers

Alarmed Fire Points For The Construction Industry

Fire Precautions (Workplace) Regulations 1997
(Provisions to be provided for raising the alarm in case of fire)

EASYLINK
Built to use again and again
Available for sale or hire

LINKED SYSTEM

A **Master Alarm** box with anti-tamper reset key for the monitoring point is provided and powered via a mains transformer 90V-240V to 12V Dc.

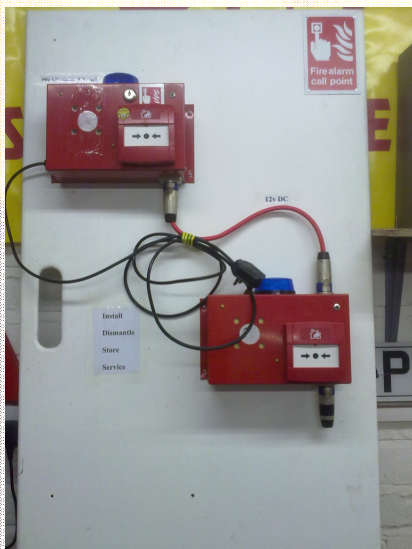

Slave Alarms are linked by robust plugs and Pyro leads making installation cost effective.

All Alarms are fitted with an **LED power on light** and a blue **flashing beacon**.

Any call point activated will operate all sounders and flashing beacons. The system is fitted with a safety loop activating units if a break in the circuit occurs.

The shower proof alarm box is currently installed in a variety of locations and is suitable for;

- Construction sites
- Small workshops
- Porta-cabins or any small building that does not require a full mains battery backup system.
